

A Annual and W10–W30 acoustic opportunity

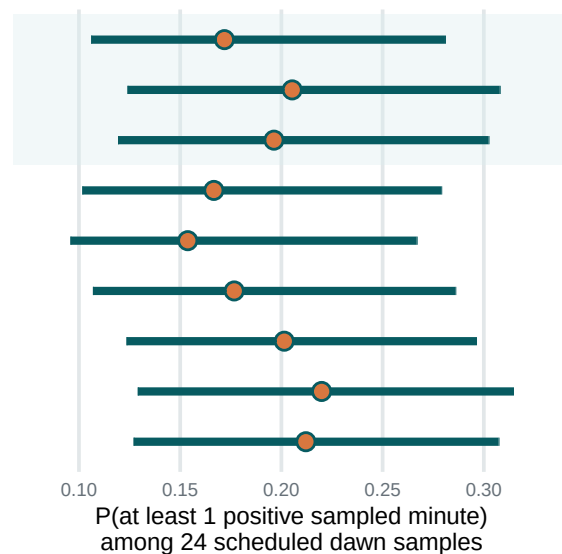

Annual mean W10–W30 mean

B Expected dawn-positive minutes

C Dawn probability, P(at least 1)

Summaries used 5,745 Primary Results and Moderate Extrapolation HEXes. Urban-function zones were area-weighted; POIs were equally weighted; uncertainty used 300 posterior draws. Points are posterior medians; lines are 95% credible intervals. Dawn metrics use 04:00–08:00 in W15–W21 under 24 scheduled sampled minutes. Urban layers: © OpenStreetMap contributors, ODbL.
